# EBB & FLOW INFORMATION

# Ebb & Flow Arenas

Enjoy the comfort and stability of a consistent, firm riding surface that maintains its own water level despite the weather conditions. Collect rainwater over the entire surface area of your arena and have the flexibility to reuse this water during dry periods.

**The Capricorn (Australia) Pty Ltd EBB & FLOW System is proven in Australian conditions. First installed in Australia in 2014.**

TYPICAL CROSS-SECTION - TIMBER SURROUND

## SOILTEX ARENA SURFACE

To complete an EBB & FLOW arena SOILTEX arena surface is highly recommended. The addition of SOILTEX will assist in maintaining the stability of the arena surface and provide additional cushioning desired for the protection of your horses overall health and physical wellbeing.
