

REBOUND RUBBER

Capricorn REBOUND RUBBER represents the latest in rubber based working surfaces. It is made using a special process which strips rubber from industrial tyres, forming solid rubber flakes that can be mixed in various proportions of sand to produce a durable, low-maintenance and cushioned working surface.

Produced in Australia

Capricorn (Aust) Pty Ltd

Father and daughter family business supplying the Australian Equestrian Industry with quality products imported from Europe since 2000.

Products are available in all States and Territories of Australia.

Home of Australia's FIRST synthetic arena surface product **SOILTEX**.

Proven and installed on over 320 equestrian surfaces in Australia.
